Selena's Recommendations:

- If denied, requests for information from public entities have a documented reason for denial.
- Establish a periodic review of requests and denials for records to help determine whether changes to the law are needed.
- Provide guidelines about what "in the public interest" means.
- Ensure we maintain existing access to public records.
- Eliminate/reduce liability for accidental disclosure of PII by public employees.
- Grant usage of records for a specific purpose in the public interest (not restricted by other reasons), but not for general redistribution en masse or for sale.
- Provide data responses in a timely manner, subject to resource constraints of the entity and whether the request can be reasonably satisfied.
